

# Why Hire a Lifestyle Organizer?

## **Why #1 - A Time Factor**

Some people don't have enough time in the day to organize closets, drawers, bathrooms, pantries, and bedrooms. Perhaps you work all day, with outside-the-home activities, and at the end of your day, you're just too tired.

This is where the professional organizer comes into the equation. They can do all the hard work for you while you carry out your day-to-day routines. While the POs are there you can communicate to them about how you want your lifestyle to be organized and which plan works best for you.

## **Why #2 - They know how to Organize**

Professional Organizers have organized the worst messes of all time. They have the ability to see the 'end results' while working in chaos, it's what propels them to move forward through the project no matter how big the mess.

They understand how to create functional systems that won't fall apart once you've reorganized your space. Professional Organizers are experienced, they have seen the worst spaces and turned them into the best spaces.

Letting a professional take a dig into your clutter might even motivate you to keep yourself organized in the future.

## **Why #3 - Valuable Partnership**

Professional Organizers aren't going to take over your life, but they will work with you until you come to a final decision: a *Clean + Organize space*. Along the journey to an organized lifestyle, they'll explain to you what they're doing - how it helps - how you can maintain the systems to make your life easier.

While working together, you can get tips and tricks on how to organize smaller projects on your own, which can help boost your confidence in order for you to give purpose to the spaces of your lifestyle.

## **Why #4 - They have a Lifetime of Experience**

The passion, encouragement, and motivation of a professional organizer are all handed to you once the job is done. With the help of a professional, you can become organized for life.

# Why Hire a Lifestyle Organizer?

Organization - is a life skill, along with the ability to make decisions. Having an organizational system will benefit you in all areas of your life. This includes having an organized schedule, organized spaces within your life, and even an organized mindset.

Your home isn't the only thing an organizer can help you with. They can help you in your **personal, professional, social, and public life**. If you're feeling disadvantaged by the lack of organizational skills, you can consult with a professional and they'll be more than happy to help you. Organizers do this job for a living and passion - they're the best people to turn to for this kind of help.

## **Why #5 - If the Job is Too Big for One Person**

There is no shame in admitting you can't get organized on your own. At times, you can let the clutter go until it's too big for you to cope with. If you're getting over a traumatic situation, sickness of a loved one, you've moved, or you're simply "stuck in a rut" and need help to get started or need the direction of where to start - it's time to call in the professionals.

Organizing is a slow process. It means taking everything out, analyze your space. It involves purging out what you need and what you don't and then fitting the items into your space strategically and logistically. There is no dumping everything into the closet or drawers for a clean + organize appearance.

Everything needs to find its own HOME! Where it'll stay and always go back to after each use. It might be a room, a garage, a basement, or an office - every item needs its own home.
